Profile

As a **full-stack web developer** with expertise in HTML, CSS, JavaScript, Bootstrap, and back-end technologies, I am passionate about building and maintaining the entire web application stack. My commitment to continuous learning and growth ensures that I stay updated with the latest web technologies. I am eager to leverage my full-stack skills and creativity to contribute to your team, creating comprehensive web solutions that align with user needs and business goals.

Education

Software Engineering (2023 - Present)

- Ongoing Higher National Diploma (HND)

Projects

Here are some of my projects that are available in GitHub
[<https://github.com/akamgodlove>]

- **E-Commerce Website** : Developed a user-friendly E-commerce website, enabling members to access product, place orders, and contact the admin.
- **Anime Website** : Created a dynamic website dedicated to anime fans, featuring latest anime releases, reviews, and forums for discussions.
- **Picture Website** : Built a responsive website for sharing and discovering high-quality images, implemented features for uploading, liking, and commenting.
- **Painter Website** : Designed and developed a portfolio website for a professional painter, showcasing their work and providing contact information for commission.

Skills

- HTML
- CSS
- JAVASCRIPT
- BOOTSTRAP FRAME WORK
- **Back-End Development**: PHP
- **Database Management**: MySQL
